

JAPAN WASTE LAW | JAPAN WASTE MANAGEMENT AND PUBLIC CLEANSING ACT

Japan Hazardous IW/SCIW Waste Awareness

COURSE	LENGTH	HOURS	FEE
Course	2 days	16 hours	\$600 / ¥72,000

ABOUT THIS COURSE

This course covers the responsibilities of waste generators and transport and disposal firms under Japan's Waste Management and Public Cleansing Act, with special emphasis on outsourcing the treatment of hazardous wastes. It also covers Specially Controlled Industrial Waste (SCIW), PCB waste, PFOS, and the records each generator must keep to comply with Japanese waste laws.

MAIN FOCUS OF STUDY

1	Waste classification and waste & recycling related laws	6	Treatment/disposal subcontracts and the manifest system
2	Generator and government responsibilities; waste treatment plans	7	Ledgers, disposal records, and government procedures
3	Outsourcing of waste treatment; treatment standards and permits	8	PCB waste: storage, transport, and disposal through JESCO
4	Import and export of wastes; administrative penalties	9	PFOS: uses, related laws, storage, labeling, transport, and disposal
5	Specially Controlled Industrial Waste (SCIW) and the SCIW manager
